## Chemists Work In Lab

Young chemists Anthony Hanenkratt, Jennifer Landrum, and Lori Sheppard discuss a problem concerning an experiment. These students are preparing mixtures of compounds to find the rates of reaction for each compound.

Some students in chemistry experienced a number of disasters this year, from cracked test-tubes to burnt glass cases but they miraculously made it through the year.

Lab makes chemistry bearable on a double-period day. It gives students a sense of control. Students are able to work first-hand with chemicals and laboratory equipment. There is much to learn in chemistry and a lot to experiment with.

## A Season For Champions

The 1985 sports season was full of victories, some shared by team members, others the work of individuals. Two definite success stories during this year in sports were the baseball team's capture of the sectional championship and Steve Dillingham's state discus championship title.

The baseball team finished its season with an overall record of 16-5. In addition to a fine season, the team earned the Lake Shore Conference and Sectional championship titles.

Senior Steve Dillingham was busy in the spring too—working his way toward the state discus championship. Hours of grueling practice paid off for Steve when he threw a school record toss of 179-10 in Columbus. He also placed second in the state in the shot put.
